## How to Load Project to INOVA QC tool app

-Get Datastore sync from recorder

-Open QC Tool app on Android device and Tap on the three lines at top of left screen

-Tap on "Load Project"

-You will be directed to "Check attached USB Stick" click on this bar.

If USB was used on this device before the Project should automatically appear.

-After tapping on "Check attached USB stick" the below message will appear... Note: Just Select USB drive... Do not click on any folders.

-Tap on USB name (In this case USB drive is named "Lexar"

-You should now see the Project. Tap to load.

## -QC app will restart
